

NEAR MISS

It almost happened. Say so.

LEAN DAY TOOLKIT

A pallet nearly came down. A truck nearly clipped someone. Every near miss written down is a lesson that arrived before the accident did — and it costs one sentence.

THE MOMENT

Nothing broke. It nearly did.

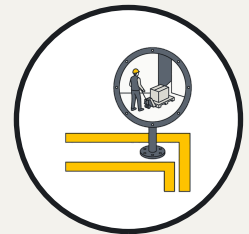

SAY IT ONCE

One sentence, where, done

THE COUNT

Rising is trust, not failure

THE FIX

One tap raises the action

WRITE IT DOWN

What almost happened, in the words said at the time. No forms, no grades, no blame.

WHERE

Name the area or the machine so the fix lands in the right place.

WATCH THE COUNT

The site with zero near misses is not the safe one. It is the quiet one.

RAISE THE ACTION

A serious one becomes a high-priority action in one tap. Put a name on it in Actions.

Report the near miss today, or investigate the accident tomorrow.
